## **How would you rate your college experience so far?**

5

---

## **What technical and study skills learned in high school were most valuable to you in your first year of college?**

Research skills, and prior programming experience.

---

## **What technical and study skills were most lacking in your first year of college?**

None

---

## **What do you like most about your college experience so far?**

Everything. Especially the classes, experience I gained already in my first year, and social aspects

---

## ***Academically* - what, if anything, is frustrating or missing from your college experience so far?**

Nothing

---

***Socially* - what, if anything, is frustrating or missing from your college experience so far?**

Nothing

---

**Any advice for high school students as they prepare for college applications?**

Research your schools online and go to them all at least once. Once you have your tops. Leap into the curriculum for your major; they're usually online. Do some researching and learn a little bit about the content in your first year classes, taking some classes from Robotics and Beyond will benefit you. This way you know you choose the correct major because you're having fun and you'll be ahead of the game when you get to class.
